Exploring clustering methods for records of continuing education

Research Question:	How can we classify or cluster training ads, which are not linked to occupations, into known groups to make them easier to manually classify or suggest currently unregulated training programs?
Background:	We have a lot of records describing training opportunities that don't map to the KldB taxonomy.
Data:	- GLMO/KldB - https://www.arbeitsagentur.de/kursnet → API https://github.com/bundesapi
